(54) Title: SOOTBLOWER FRAME ASSEMBLY

(57) Abstract: A sootblower frame particularly adapted for long retracting-type sootblowers for cleaning of internal surfaces of large scale combustion devices. The frame, preferably formed from sheet metal stock, incorporates integrally formed surfaces and configuration features which provide for guiding and movement of the sootblower carriage assembly. The side panels of the frame further provide the surface for the mounting of the drive rack by which the carriage is advanced and retracted along the frame.
